Hi Vicki, I'm not clear on what exactly is needed. I'll give you a call.

Hi – I took off everyone else. I spoke to Gina and Lou about the BaP document that has the figure in it as well as the science topics. Rather than formatting this, I think that it would be best if we just use the text on the website. This would be similar to what we have done with other meetings and the science topic text.

Kathleen – I will change the text about the first question to match what Ravi wanted it to say. Lou also asked that you add a footer to the figure (or some descriptive text) to explain it. Can you take a look and send me a few draft sentences as soon as you can. We will be posting the website next week. I will let you take a look ahead of time. Call me if you have questions.

Thanks
Vicki

Oops! I see that the original thread did not include Kathleen or Karen, and I had done a "reply all". Resending with Kathleen and Karen included.

BaP:

The header of the meeting should be changed to “Determination of a potency for Benzo[a]pyrene-induced skin cancer”

Change the header on the first question to: “Determining appropriate dose-metrics for expressing absorbed BaP dose.” As currently stated it sounds like we don’t know how to write units for what we calculate.

Also the landing page needs some changes in regards BaP. In the boxed (in red) announcement of the Sept 14 meeting, the header of the link says “SAB CAAC Review-Draft Tox review of BaP”. While the intent here is to take the reader to the SAB’s review document, the header makes it appear as if we are inviting a discussion of the SAB review. How about:

Sept 2014

Determination of a potency factor for skin cancer following dermal exposure to BaP

[Link → SAB review of . . .]

Please use this link to log into the staging server: <https://wcms.epa.gov/user> then click this link to access the draft website: <https://wcms.epa.gov/iris/iris-public-science-meeting-june-2016>

The one below is not correct – thanks, Vicki

Subject: !!!PLEASE REVIEW TODAY!!! - June 29-30 public science meeting prep

Hi – this is the initial website for the June meeting. I need to send this information to NAS *today* so that they have the science topics we will be discussing during our conference call tomorrow. I made changes to the text based on the meeting we had on the TBA/ETBE science topics on Monday (ie – the text of the science topics for TBA and removing mention of ETBE).

Some questions:

1. Is the order and wording of the TBA science topics OK?
2. Is the overall presentation of information (the tabs) OK?
3. I included the small paragraph we used from the RDX website saying that the IRIS program is providing the science topics and we aren't looking for input on them – is this OK?
4. Is the Title of the materials "Dermal Slope Factor Approach Benzo[a]pyrene OK?

Login with your network un/pw here first: <https://wcms.epa.gov/admin/epa-dashboard> then
Review the webpage here: <https://wcms.epa.gov/iris/iris-public-science-meeting-june-2016>

We are trying to sync with the release of NAS' nomination page so some additional information about their dates and links will be added before the release next week.

Thanks - Vicki

Hi Maureen,
Attached is a scan of edits to the June meeting website. I have the hand marked-up sheets if those would be better (easier). The biggest change is that ETBE is coming off and it will only be TBA now. ETBE will be in the September meeting.

Thanks,
Vicki

Hi Maureen,

This is the preliminary text for the June meeting. Is it possible to put this on the staging server? Can we have different tabs for the meeting materials for TBA and ETBE and then BpA?

Thanks - Vicki
